"The Arms Race"

"Non-lethal Arms Race"

The Arms Race is entirely lethal weaponry. Remove the lethality by turning it into a non-lethal arms race and all other elements will remain equal, but you will have removed the death toll from all societies on earth.

A legitimate government does not kill; but it educates. The death penalty is vengeance and revenge against a person who has committed a crime; this is the antithesis of Justice. True Justice works for the betterment of all people involved, and it works in hand with Truth. Truth is not obtained by murdering or killing or destroying; it is only obtained through obeying God's Word: "thou shalt not kill". That the meaning of life is to obey God is the only legitimate foundation of any society; obeying God's Word must be the core value of any legitimate government and cannot ever be broken without disastrous results on the human race and the entire world. Human life is the most valuable life of all on earth; we kill animals to eat them, but we do not need to have lethal weapons for this purpose, only tools such as knives, nets, and other technologies to trap and eat our food. A proper government uses the justice system to rehabilitate and improve the situations of everyone involved. A proper justice system works as an extension of the educational system; where the educational system was not sufficient to impress upon students the necessity to do what is right, or the difference between right and wrong, the justice system must continue that education. It must not murder or let a person rot in jail or throw them into the electric chair or kill them in any other way. It must do what is right and just by working to improve the situation of both the one who would oppress and the oppressed. It must exemplify loving your neighbor and loving your enemy and working to improve the situation for all those involved.

The bottom line is this: WE DO NOT NEED WEAPONS.

The issue is one of power and control. As far as I am concerned, everyone is psychotic or neurotic in certain ways. If these people are seeking help, they can find help. But if a person is at the point where they threaten your life with a tool abused as a weapon or with any lethal weapon, you have a choice to make in your response. If your choice is to defend yourself, you can do so with either a lethal weapon or a nonlethal tool of apprehension, pacification and incapacitation. What you need is not a more lethal weapon in your hand, but you need a power-superior defense or non-lethal offensive tool to defend yourself.

How to solve The Arms Race:

Step 1. Stop manufacturing lethal weapons.

Result: everyone in possession of a lethal weapon is readily identifiable as a threat to be pacified; black market for lethal weapons increases; the value of lethal weapons increases as people stockpile them in paranoia.

Constants: psychotic people who want to kill will still try to kill with lethal weapons

Constants Changes: murderers will no longer be able to kill as many people, since ammunition will become scarce and they will resort to crafting their own knives, guns, bombs, etc.

Step 2. Change the lethal arms race into a non-lethal arms race.

Result: death toll drops dramatically -- consider: how many people have been killed by another person? untold trillions of lives will be saved. police and law enforcement and military no longer carry lethal weapons, but tools to incapacitate, pacify and apprehend safely and legitimately, if such force and tools become necessary.

Constants: psychotic people who want to kill will still try to kill with lethal weapons

Constant Changes: murderers will find that lethal weapons are no longer effective to exert power or control.

Presently, we have terrorists who wield machetes and swords. When they go up against machine guns, they say, "these swords are no longer effective," and they buy machine guns instead. When they go up against bombs, they use bombs instead. When they go up against nuclear weapons, they use nuclear weapons instead... this is a path of death and destruction for mankind.

The solution is to remove the lethality of the tools, to improve the technology of the non-lethal arms race so that the lethal weapons are no longer effective in exerting power or control. It is about superior technology. Death and lethality do not need to be an element in the equation.

The role of the judicial and executive government is to seek the truth of a situation and work for True Justice, not vengeance, revenge or destruction.

Now when terrorists see that machine guns, bombs and nuclear weapons are no longer superior technology, they will do what they have always done: try to obtain the superior technology, so that they can use it to exert more power and control. But in doing so, people will not be facing mortal consequences, because the superior technology will be non-lethal.

The lethal arms race has had such a focus and investment by the military and all societies that the non-lethal arms race is presently inferior in technology. But if we can invest in greater means of killing more and more people, we can invest in greater means of apprehending, pacifying and incapacitating more and more people, if such force were ever to be necessary -- but such a scenario would still be superior in all ways to genocide.

We will still have psychotic people, and we can still work to help them get well. All other aspects of the problems of humanity will remain the same, but untold trillions of lives will have been saved simply by changing our focus from the lethal arms race to a non-lethal arms race. We must base our entire motivation upon obeying God's Words, for this is the only way true justice will result in a society and a government could ever hope to be valid. Thou Shalt Not Kill. We need to develop the non-lethal arms race, in both its offensive tools and defensive tools, such so that no person's life is ever jeopardized, whether they are the worst criminal to ever live or a newborn babe.

In sum,

- Convert the lethal arms race into a non-lethal arms race, so that the technology used to apprehend and pacify is superior in efficiency and effectiveness to the lethal weapons technology.

- This procedure includes the ceasing of lethal arms manufacturing and use by all law-abiding people, including the military, police, government agencies and citizens; and the focus on the development of the non-lethal arms and superior methods of living according to God's Commands. "I am weak, but God is Almighty and loves me." In our development of tools in the non-lethal arms race, we must base all of our efforts upon the wisdom that God alone is in absolute control and God and Jesus Christ alone is trustworthy. The technology must suit the purpose 100% -- non-lethal, non-harming, and efficient in Justice for everyone involved in a situation. The non-lethal arms in our present technology are insufficient because they are too hazardous by being potentially lethal.

- All our efforts must reflect that we serve God; we as a world must recognize the difference between those who serve God and those who do not. Those who do must base all their efforts on obeying God, and that includes helping those who do not serve or know God to get the psychological and spiritual help from God they need. If a person is at the point where they are looking to kill someone, then that person needs help; shooting them or harming them will not help them, but using technologically-advanced tools to pacify and apprehend them without harming them is a potentially valid step along the way towards helping them with their dilemma. We must love one another, because that is what God commanded us despite our many shortcomings and psychoses and neuroses that each of us have. Everyone is weak, but God is Almighty and does not change, and God loves each of us. The only valid action is based upon God's commands; and when we obey God's commands, it is then that we reach the solution to our mental and physical and spiritual deficiencies -- for all Truth, Logic and Wisdom is found in knowing and obeying God according to His Word Jesus Christ, and it is in God's Salvation Jesus Christ that we are truly sanctified and of sound being. This is not of our own strength, but of God's strength; God can do anything, because God is the Lord God Almighty. You must obey God and keep watch.
